

Gabriele G. Schiattarella MD PhD

Gabriele G. Schiattarella is a MD/PhD cardiologist-scientist whose research focuses on molecular mechanisms of remodeling in the disease-stressed myocardium. Dr. Schiattarella received his MD from the University Federico II of Naples (Italy). After completing the Fellowship in Cardiology (Cardiology board) at the same University and starting a PhD program in Experimental Medicine, he moved to the UT Southwestern Medical Center in Dallas, Texas, USA. Dr. Schiattarella is Professor of Cardiometabolic Disease leading a research group at Charité University Medical Center and Max Delbrück for Molecular Medicine in Berlin focused on molecular mechanisms and clinical implications of HFpEF, HFrEF and interorgan crosstalk in cardiometabolic diseases.
