

Gonano LA MD, PhD.

Dr. Luis Gonano is professor of Physiology at the School of Medicine - University of La Plata, Argentina and associate researcher at "Centro de Investigaciones Cardiovasculares CONICET-UNLP". He obtained MD and PhD degrees at the University of La Plata in Argentina and was postdoctoral fellow at the University of Otago, New Zealand. His research is focused on cardiac Ca^{2+} handling, with particular interest on the modulation of cardiac ryanodine receptors and its consequences for systolic function and cardiac arrhythmias. He collaborates with local and international groups and is part of the editorial board of recognized journals. Luis was member of the local committee that organized the world congress of ISHR in Argentina, served as member of ECI and is currently part of the MCI committee of the ISHR.
